

Setting up shared network resources for 2Simple programs

For the latest version of this document please go to www.2simple.com > support > networks

Whichever way you choose to install 2Simple programs (see www.2simple.com > support > networks for a list of the different ways), there are a number of further steps to make the most use of these programs across a network.

1. **Shared Databases - 2Email, 2Type and 2Review** use shared databases. See the 2Email, 2Type and 2Review FAQs for more information: www.2simple.com > support > Tech Questions
2. **Shared Resources - 2Investigate and 2Connect** work as stand-alone database and concept mapping applications respectively, but they can also host collaborative databases / concept maps which are accessed by multiple pupils at the same time. See the 2Investigate and 2Connect FAQs on www.2simple.com > support > Tech Questions.
3. **Shared Results – 2Assess** results should be centralised. See the 2Assess user guide for more information.
